What

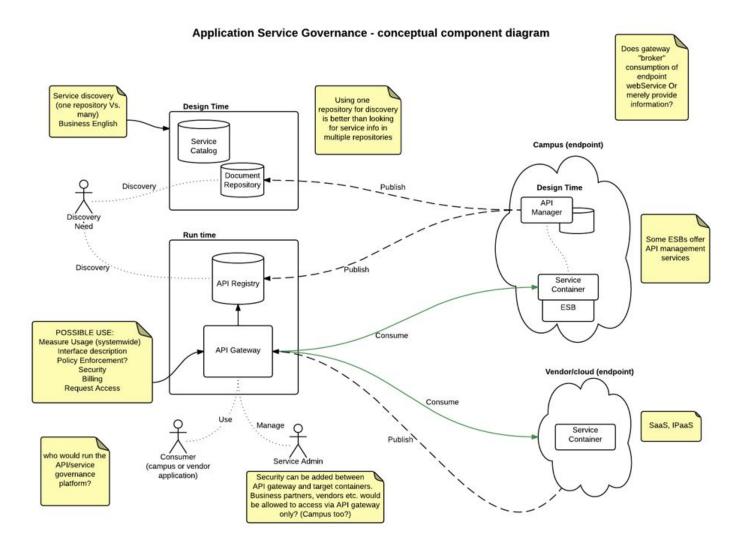

UC TRUST

Subcommittee of ITAC

Mission - "provide input on design and implmentation of identity management solutions for the UC system and to foster collaboration on IAM solutions among the campuses"

API Subgroup

Identify and propose standards, platform capabilities that support and promote the principles of "Interoperability", "Reuse and Leverage Services Approach", "Deliberately Plan Technology Platform variations" with respect to application integration platforms.

A Bit on the EA Glossary

 A great way to start and quell arguments on your campus around the meaning and understanding of EA and IT terms

- Over 5900 uniqe entries
- +1,100 pages crossed referenced

- Created and maintained by Bo Pitsker from UCOP
 - bo.pitsker@ucop.edu

A bit more on the Glossary

The Glossary targets terms and definitions from select subject areas, including but not limited to the following:

- Enterprise architecture
- · Business, Data and Application architecture
- Infrastructure/technology architecture
- Security and identity management architecture
- Solutions architecture
- · Risk, privacy, and compliance
- · Project management
- · Service management
- · Record management
- Physical security

University of California, Information Technology Architecture Committee (ITAC*)

The ITAC is a working sub-committee of the UC Information Technology Leadership Council (ITLC), and ITLC establishes our priorities and directions, and resolves questions regarding scope, strategy, and/or policy.

Our mission is to "establish the enterprise architecture and technology infrastructure necessary to promote and support interoperability and sharing of IT solutions among and between campuses" (Foundation for Collaboration on Technology Enabled UC Solutions, Pillar II, March 2013).

We facilitate knowledge sharing and collaboration across the UC campuses, and work in concert with the UC Information Technology Services (ITS) Enterprise Architecture (EA) Team, to inform and enable reuse of the UC EA Body of Knowledge (EABoK). We support implementations of UC-wide initiatives, and can assist each UC location with discussion and review of the variety of artifacts available in our EA BoK.

*formerly known as ITAG

EA Resources

EA resources can be leveraged by any UC location as they design, develop and deliver a shared senice for multiple locations across the UC system. These resources include the EA Artifact Framework, the EA Glossary and the EA Body of Knowledge (EA BoK). (Access to all these resources requires separate login.)

EA Artifact Status

EA artifacts represent common practices and technologies across the UC system, and include principles, standards, guidelines, reference architectures, business process models, logical and physical data models, metadata, application portfolios, best practices, procedures, and more.

ITAC representatives facilitate the review of these artifacts at each UC location, confirm CIO adoption, and assist with conflict resolution and communications at their respective locations.

More>>

IT Checklists

IT Checklists are available to UC IT Teams, and can help identify and confirm the various components that enable quality service delivery and operational support. The checklists cover a variety of domains - applications, data, technology, and security. Feel free to download any checklist and modify as needed; if you make modifications please send a copy to ITAC so that we can make them available to others.

Welcome to the ITAC Wiki

This wiki space is where you'll find information on the various initiatives and activities of the EA and ITAC teams:

- About
- Charter
- Communications
- Documentation
- Meetings
- Webinars
- Membership
- Roadmap & Requests (Archive)
 WikiWorks (login required)

Please note that some of our content is available only to University employees.

If you have comments, suggestions or requests, please contact your ITAC representative or the ITAC Chairs.

Weekly Conference Calls

Every Friday (excluding holidays), 10-11am:

- 1st week General
- 3rd week Leadership
 All others EAA Reviews

and CIOs from across the University of California. We recommend using the assets as where appropriate and as frequently as possible when implementing technology

Getting Involved

Want to learn more about an existing EAA/standard or practice?

Do you want/need a new EAA/standard developed?

Need architecture input for a project, proposed application or vendor solution?

Getting Involved

Example: Want/need a new EAA/standard developed

Joshua Van Horn - UC Davis

EAA-065 Event Logging and Management

Lakshmi Dasari - UCLA

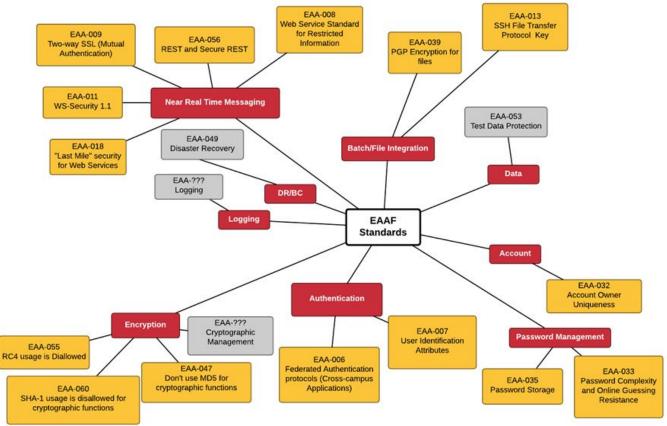

EAA-008 Web Services for Restricted Information

Getting Involved - Find your ITAC Rep
